

Drainage Bags.

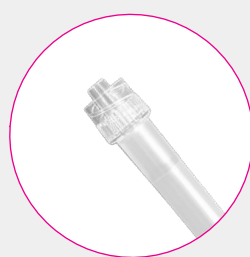

Our range of drainage bags have been developed specifically for patients requiring percutaneous drainage. The luer-lock hub provides a secure connection between the catheter and the drainage bag, maintaining a closed system and reducing chance of fluid leakage or infection. A selection of sizes from 600ml to 2L are available.

600ml Day bag product benefits:

- **Secure connection to the catheter, maintaining a closed system to reduce chance of leakage or infection**
- **Prevents friction & sweating when sat against patients skin**
- **Easy to empty with ergonomic lever tap design**
- **Drainage line designed to prevent kinking**

Product features:

Luer-lock connector

Soft fabric backing (600ml only)

Anti-kink tubing

Easy to use lever style tap
